

of a vivid and cosmopolite city

UB is the heart of a multicultural and cosmopolite city, in which student life is enriched at every step by fascinating cultural experiences and entertainment. Geographically, the Capital is situated at relatively small distances from both the mountains and the Black Sea.

As a student in Bucharest, you will have the opportunity to spend quality time in the biggest city of the country, to visit museums, palaces and memorial houses, to go to theatre and animation shows, to take part in the greatest festivals and concerts of the year, to see newly launched movies in large cinema halls or in open air. Near Bucharest, you will find many facilities where you can try tandem skydiving or parachuting. And if you enjoy extreme sports like climbing and alpinism, besides being close to the mountains, you will find specialized indoor facilities for daily training. Moreover, if you go to the Old Town, you will discover a city that never sleeps and where parties end only late in the morning.

The city is student friendly and you will find numerous restaurants, museums and gardens, fitness clubs, gyms and other sportive facilities that offer promotional packages and special prices for students.

#### UNIVERSITY OF BUCHAREST

With a history of over 150 years and a constantly renewed prestige, the University of Bucharest is today a student centred, dynamic and inclusive academic environment, characterized by creativity, innovation and pragmatism.

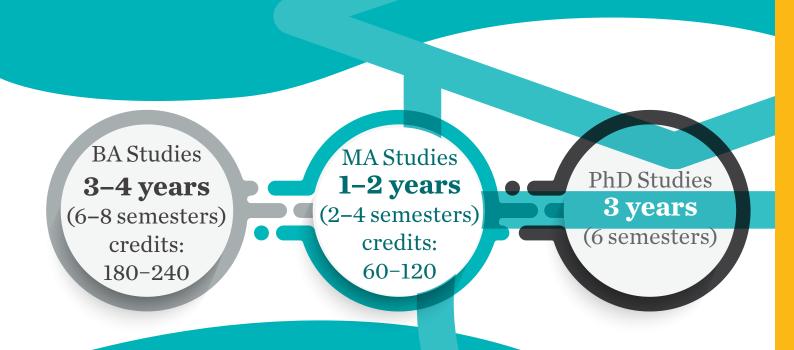

As an institution of excellence in education and research, UB made a priority of preparing its students for life and profession. Hence, UB is acting constantly and determinately in order to guarantee a smooth and efficient integration on the labour market for its graduates, no matter the domain or programme of studies.

A central actor of the Romanian and European higher education area, the University of Bucharest is engaged in a permanent process of adaptation and internationalization, opened to multiculturalism and diversity. Its membership within CIVIS – a European Civic University –, alongside other seven top European universities, as well as the numerous international partnerships established over the years, confirm once more the continuing efforts UB is making to ensure various mobility and exchange opportunities to all its students.

## Business and Administration

While studying at our faculty you will meet a multitude of opportunities: experience exchanges with other faculties in the country or from abroad, meetings with successful entrepreneurs, a strong academic community centred on interests and benefits of the students.

Moreover, besides the most enjoyable projects, here you can make the best friends and the most beautiful memories! [Radu]

### Biology

Three years ago, I chose Ecology because it was something new, something you don't hear about every day... Now, if I went back in time, I would choose again this road. Why? When you hear ecology, you think about nature, trees... And, as we all know, there are real issues regarding the loss of biodiversity, the fragmentation of habitats and climate change. Here, I had the chance not only to discover all these, but also to learn how to fight these issues and to personally try to identify solutions to all of them. And in addition, it gave me the motivation to go further and to discover a new passion: photography. [Gabriele]

# Chemistry

If you are wondering why to choose the Faculty of Chemistry, I can give you a few simple reasons. The first of them might be that a Chemistry student has all the solutions for the problems he or she may encounter. Everyone knows that coffee is the best friend a student may have. But only a Chemistry student knows the precise concentration of caffeine for "surviving" the final exams. Also, if you like games, the Faculty of Chemistry is the perfect place for you. Why? Because here you can find the best words for the game "The Hangman". Among them, phenolphthalein, chromatography, and many others. A Chemistry student also learns to see the glass always full: one part in liquid state, the other part in gaseous state... [Anca]

### Law

56 For me, the Faculty of Law of the University of Bucharest means, above all, prestige. A place were academia and erudition, exigence and elegance, The Faculty of Law was and it continues to be a place of academic, professional and personal accomplishment.

When I arrived at this faculty, without any real knowledge in the domain and with only a smile in my pocket, I met talent, portrayed in my teachers, for whom each course and seminar represents a new challenge to reach us, students. It is the place where I really felt that the activity of the students matters, each of us representing a significant piece in the complex and charming mechanism of the Faculty of Law. I understood that this is the place find their way in becoming reality, without losing an aura of decency and diligence. It is an intersection of opportunities, no matter the specific personality and interests of students, opportunities which manifest in conferences, national and international competitions, research programmes and centres, as well as other activities meant to enhance our knowledge. I started on this road looking for the confirmation that I chose the suitable faculty for me and I reached the certainty that here I can learn how to give a noble

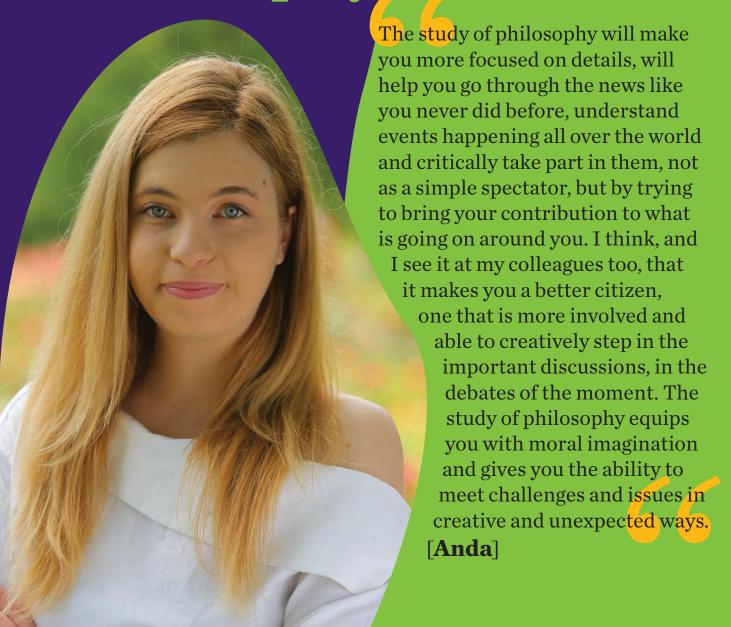

drept.unibuc.ro

sense to my becoming. [Maria]

# Philosophy

filosofie.unibuc.ro

# Physics

I think that the most valuable thing you learn at the Faculty of Physics is to think critically, to have a logical approach about things and to reduce all phenomena to fundamental principles. To be honest, physics is not simple, but it really shouldn't be, because physics is meant to explain an incredibly complex reality. In the end, the first step for scientific progress is to realize what you don't know and to realize what you can improve. The second step is simply to join us at the Faculty of Physics and to become one of the people who achieve progress, not one who only reads about it after it has already become history. [Amanda]

### Geography

Why Geography? For the interesting information you will receive from the teaching staff, because teachers are open-minded and because of the interactivity of the educational process. Your curiosity will be highly satisfied. Then, for all the interesting team projects, which will give you specific abilities, for the well-known fieldwork that will allow you to see the world from new perspectives and to travel together with your friends and colleagues.

So, I strongly recommend you to be curious and to search information about everything! [Roberto]

## Geology and Geophysics

I chose this faculty for the incredible career opportunities and for the many fieldwork activities that bring us closer and make us real colleagues and even part of a large family, for the teachers, who are not only open-minded and real professionals, but also bring to light the best in us and, of course, for the dinosaurs trace fossils, that we discovered in several occasions. So, join us at the Faculty of Geology and Geophysics if you want to meet Hatzegopteryx! [Sabina]

## History

Why to choose our faculty? As students in History, we grow up together into responsible adults. We learn how to better understand our society and to enlarge our horizon. Some of us are going to become teachers one day and will offer the joy of learning about history and the phenomena which took place in time. Others will choose different professions where the knowledge of analysing history will provide a special expertise. For me, History represents the opportunity to study human evolution from the first signs of civilization to space travel.

[Alexandru]

## Journalism and **Communication Studies**

Why did I chose this faculty? Firstly, I wanted to have an insight of communication, advertising and journalism.

I had the chance to take part in interesting and challenging projects during the courses.

I also had many opportunities to participate in Erasmus projects, in which theory met practice. All these mean FJCS. Why? Because committed teachers are putting into practice projects dedicated to students. Join FJCS! [Claudia]

## Foreign Languages and Literatures

FACULTIES

### Letters

Time travelling is allowed. Word games too. Five reasons to join us? Commitment. Diversity. Creativity. Professionalism. And community. Surely, you will discover thousands of reasons to join our faculty! So many books, so many reasons to join the Faculty of Letters from Bucharest! [Maria & Diana]

### Mathematics and Computer Science

During the three years of college, I met a lot of passionate teachers eager to help. One thing I especially like is the fact that most of the labs and seminars are held by the master students of our faculty, thus offering a relaxing and friendly working atmosphere. Other things that many students enjoy are optional courses. I chose to take an Introduction to Robotics course, where students are encouraged to do projects with real-life applicability, which they can develop later. Thus, I found a field that holds a great interest to me and I met a lot of people who work with passion and enthusiasm. Another aspect of college that I like is the Mathematics and Computer Science Student Association, which is a large group of volunteers who organize projects for students. As a member of the association, I can say that being part of such a community means a lot of impressive work, personal development, and a productive and qualitative student life. [Ioana]

Psychology and

Education Sciences

At FPES you will find everything you need to become a good professional. You will find well prepared teaching staff, committed in helping and guiding your first steps for a career in psychology, pedagogy, teaching or special pshychopedagogy, practice opportunities in recognized institutions, national and international research and development centres, modern learning facilities and a student association that will always be there for you. From personal experience, I can tell you that the decision to choose this faculty completely changed my perspective on life. I met extraordinary people and I had the occasion to participate in different contexts that helped me realize what I expect from myself, from my future and from the people close to me. [Cristina]

# Sociology and Social Work

Our faculty offers many study programmes like Sociology, Social Work, Anthropology or Human Resources. If you want to work with people and if you want to help others, then come to this faculty, where you will learn to work with people having all kind of situations: from people who don't have a shelter to people deprived of freedom. We also have a strong student association, which is extremely active in representing student interests and helping them to integrate in the faculty and to get used to student life, encouraging teamwork and personal development.

[Bianca Alexandra]

### Political Science

Are you passionate about politics? Do you want to make your studentship a memorable one? Then, our enthusiastic student community awaits you to take on its special vibe. Imagine your years as a student as an adventure! Here you will find alternative learning techniques. You will walk in the shoes of a political candidate or of a diplomat. You will develop your critical and analytical thinking. You will uncover the secrets of political sciences and you will discover the sophisticated world of international relations. Here, colleagues and teachers alike will grant you unconditional support. Sometimes you will laugh, sometimes you will cry during sessions; you will find the joy of each success and, without even noticing it, from the timid first year student, you will become one of the veterans of our faculty.

Do you want to fly away from your family nest and prove that you are able to confront life's challenges? Would you like to study abroad? Doors are waiting to be opened through the numerous academic mobilities granted by our faculty. Once you enter this universe, you will notice that FSPUB promotes the academic debate and the pluralism of ideas, it encourages originality and it grants support to universal values and cultural diversity. To put it in a nutshell, we are waiting for you to join us in this adventure of exploring political sciences! [Claudia]

# Orthodox Theology

# Roman Catholic Theology

66

I chose this road because I wanted to find answers to certain questions regarding the human being as a whole, our relations with other human beings and with God. In this faculty I discovered courses and programmes that approach this problem from a broader perspective, not a purely theological one. This approach takes into consideration areas like philosophy, anthropology, psychology and – why not – even civil law. [Marian]

Baptist Theology

It takes courage to make a decision regarding your future. I want to tell you a few reasons why you should choose the Faculty of Baptist Theology. Firstly, you benefit from a double specialization: Social Work and Theology. You have the opportunity to contribute to the consolidation of the public or private social work system. In addition, you have the possibility to work with people in different social contexts. And all these mean courage. If you want more than simply having a job, then the Faculty of Baptist Thelogy is the faculty you need! You will receive guidance to obtain what you want: courage and change! [Florina]
