Dear colleagues,

It is my privilege and pleasure, on behalf of organizing committee, to announce the Workshop „**Challenges of tumor profiling in translational research**”, organized under the European Project COST CA17118 „*Identifying Biomarkers Through Transnational Research for Prevention and Stratification of Colorectal Cancer*” (TRANSCOLOCAN).

This international meeting will take place on **September 20-21, 2021**, in the „Voinov” Amphitheatre of **Faculty of Biology, University of Bucharest**.

According to the objectives of Working Group 3 (WG3) „*Tumor profiling*”, the general focus of this meeting is to generate genomic, epigenomic and transcriptional profiling of adenomas and colorectal cancer and to integrate the data generated with clinical features, to identify new biomarkers for prognosis and prediction of treatment response.

We are planning for an instructive workshop for the first day and focus on our own matters for the second day. Potential collaborative projects regarding WG3 in this specific topic will be discussed and emphasis will be made on realistic objectives that can be achieved on the near future by participants as a collaborative effort.

We are confident that the topics proposed will lead to fruitful discussions and future international collaborations

Besides official MC members, additional participants will have to earn their participation on merits, expressing their interest for attending according to the alignment of this meeting with their current research.

If your research is focused on the meeting topic, we cordially invite you to send your **Expression Of Interest** and Abstract of potential research presentation (oral or poster) to the Committee members, until **August, 15th, 2021**. The selected abstracts will be published in the *Reviews in Biological and Biomedical Sciences* (<https://rev-biomed.unibuc.ro/>), an online, open access, multidisciplinary journal published by University of Bucharest, Romania.

More information's can be found on the meeting link:

We are looking forward to welcoming you!

In the name of organizing committee,
Assoc. Prof. Dr. Elena Ionică
